The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 4, 8-17, 19-23 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hercules in view of Fischer as further evidenced by Lowe and Schwartzberg for reasons of record.

Applicant argues that there is no suggestion in Hercules to use the insoluble fibers of Fischer. Also, applicant argues that Fischer only discloses utility in ice cream and sorbets. This argument has been considered but is not persuasive. If one of ordinary skill in the art were looking to enhance the thickness of his salad dressing, it would have been obvious to look to an additive with viscosity enhancing properties. Fischer clearly teaches the application of his fiber "where viscosity enhancement or thickening are acceptable as a side effect of dietary fiber fortification." The fact that salad dressing was not mentioned in Fischer does not prohibit or teach away from a dietary fiber application to salad dressing. Applicant argues specific emulsifiers but applicants' emulsifiers are the same used in Hercules. Applicant argues the taste and appearance of the product but no

difference is seen between the taste and appearance of applicants' product and the taste and appearance of Hercules in view of Fischer.

Applicant argues the use of a high-pressure homogenizer. Most of the claims are product claims. the use of an homogenizer is not mentioned in these claims. In method claim 14, homogenization is described as an optional step so no criticality is attached to the use a particular homogenizer.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory

period for reply expire later than SIX MONTHS from the mailing date of this final action.
